LAB #01

Introduction

Programming Fundamentals · C++

NAME	Muhammad Junaid
REG #	38-001-2026-04952
ROLL NO	50
SECTION	C

LAB OBJECTIVE

Introduction to programming

TASK 1

Run the following program and check the output.

CODE

```cpp
#include<iostream>
using namespace std;

int main()
{
  cout << "hello world" << endl;
  // prints hello world;
  // endl ends the line
  system("pause");
  // keeps output window open
  return 0;
}
```

OUTPUT

```
hello world
```

NOTE system("pause") is a Windows command that keeps the console open until a key is pressed. endl adds the new line after "hello world".

TASK 2

Write a C++ program to print the following lines:

```
You are 10 years old.
You are too young to play the game.
```

CODE

```cpp
#include <iostream>
using namespace std;

int main()
{
  cout << "You are 10 years old."
       << endl;
  cout << "You are too young to
       play the game." << endl;
  return 0;
}
```

OUTPUT

```
You are 10 years old.
You are too young to play the game.
```

TASK 3

Write five C++ statements to print the asterisk pattern as shown below.

CODE

```
#include <iostream>
using namespace std;

int main()
{
  cout << "*" << endl;
  cout << "**" << endl;
  cout << "***" << endl;
  cout << "****" << endl;
  cout << "*****" << endl;
  return 0;
}
```

OUTPUT

```
*
**
***
****
*****
```

NOTE Each cout statement prints one row of the pattern, and endl moves the cursor to the next line.
